2022

FRONTIERS IN COOPERATIVE BANKING AWARDS

NCBS & FCBA Awards Conference

 16th - 17th September 2022

 Marriott Hotel, Indore

Re-Hashing to

Re-Hashing to

The saying “If you always do what you have been doing, you will always get what you have always got” is quite true for all businesses including the cooperative sector. The sector is today in midst of several opportunities hidden inside innumerable challenges that have emulated in front of the sector. Positive Thinking and effective action is what will catapult the sector to newer heights and therefore Rehashing to Rise is the theme for National Cooperative Banking Summit 2022, where we discuss who banks have to re-think their business, clean up unwanted practices and adopt innovations and newer ideas to stand in competition with the new age financial services and yet comply to ever changing regulations.

The Cooperative sector has brought in a lot of interesting innovations in the last couple of years which has been a silver lining in the armour. The Digital transformation of the industry and availability of agile technologies like cloud, RPA, Reg Tech and Fintech have brought things closer to affordability of banks. It now remains the calibre of the banks as to how they can take advantage of this opportunity.

The theme of **FCBA 2022** would be Re-Hashing to Rise. In this theme, We would cover the following aspects.

We look forward to connecting with forward looking technology providers like you to take these discussions and work towards taking your Cooperative banking business to newer heights.

Best wishes

Babu Nair
MD, Head Research and Founder
Banking Frontiers, Mumbai.

S E S S I O N S

RE-hashing Business Strategies for Rising:

This is a CEO and Chairman Conversation where we will discuss the latest business strategy changes that come in light of the latest regulations. We will discuss what is now possible and how organizations can look at better possibilities and what should be the areas of focus. We will explore the oasis of height growth in the sector and decide which areas where it is not worth investing time and resources.

Creating an Agile cooperative Bank of the Future:

This will share how the Banks have to relook at their existing business and technology strategies. Know what to keep and what to discard to ensure that it does not eat into productivity and income. IT will discuss what kind of tunneling can happen between some of the existing tech stacks and modern cloud-based or agile technologies to ensure that it takes banks to fast track.

RE-thinking Security:

Cooperative banks are a sitting target to fraudsters considering their limited understanding. In this session, we plan to discuss strategies like Managed services, hybrid security, security manpower of the future, Risk mitigation strategies, and Resilience strategies. We will also discuss cybersecurity and Cyber insurance to make this conversation useful for the next generation.

RE-silience and Business continuity:

This session will focus on how banks must look at resilience strategies to not just face unknown attacks and challenges but also build a backup and return to normalcy. This includes conversations on Back-Up, BCP, Multi-pronged approach, Auto business continuity as a service, and much more.

RE-hashing Cooperative banking payments:

Many cooperative banks are yet to join the national bandwidth speed set up by the NPCI, Payment gateways, and instant payment networks. This session will focus on what kind of innovations can empower banks in the world of instant payments and related areas.

RE-hashing the lending business:

The conventional lending business has gone through a revolution with the advent of unstructured data and therefore organizations are re-looking at their lending businesses where they either modernize their approach or align with the Fintechs to add more power to the lending business. Collections, automation, Risk management, etc. form an important part of this strategy.

RE-hashing experience:

The world of experience has gone into a 360-degree turn with most customers getting web savvy and now showing redness to banks remotely. We will discuss the challenges and the availability of business and technology strategies to make this experience seamless and enjoyable but the customers thereby increasing bottom lines.

RE-thinking Compliance & role of RegTech:

The Concept of compliance is becoming a constantly changing goalpost. Right from Reporting, Document management, automation, etc., compliance is not just a run-of-the-mill function but a very strong business component that redefines the reputation and the business viability of cooperative banks. In this session, we will talk about the key compliance changes and the role of Reg tech is redefining the same.

RE-looking Insurance Revenues:

With the Pandemic making health insurance stronger, there is also a stronger demand for the General Insurance and Life insurance business which is catapulting the need for partnerships, engagements, experience, and so on. IN this session, we will discuss, rethinking strategies away from conventional business and explore the newer potential of this strongly growing market which today has sub-3 % growth rates. This will enroll lead gen and promotions to the right target sector.

The vision of Visionaries:

This is a session where CEOs and MDs will discuss their major innovations, and their impact on society, the business, the people, and the ecosystem as a whole. This is the jewel in the head of FCBA and a session not to be missed out on.
